

Botanical Extracts Since 1971

Experience, Traceability, Purity, Potency and Sustainability

ABOUT US

Euromed® is the world's first manufacturer of standardized milk thistle extract and the leading global supplier since 1971.

Barcelona
Headquarters

Murcia

Over 50 years of scientific excellence

Founded in 1971 by the German phytopharmaceutical company Madaus and now part of Dermapharm AG, Euromed® is a leading global producer of premium standardized herbal extracts and active botanical ingredients for the pharmaceutical, dietary supplements, functional foods & drinks, and cosmetics industries.

Knowledge of botanical species and cultivation

Euromed's agronomists and botanists travel the globe to identify optimal geographical environments for sourcing premium "pharmacopoeial-grade" botanical raw materials.

Seeds from selected cultivars are identified and cultivated following Good Agricultural and Collection Practices (GACP).

Farmers are trained to adhere to company cultivation guidelines, including those required for organic cultivation, harvesting and post-harvest processing.

QUALITY, TRACEABILITY & SUSTAINABILITY

We rigorously monitor the entire supply chain, from soil selection to harvesting and quality analysis, to ensure the purity and potency of the raw materials.

The Phytoproof® concept is Euromed's identity, ensuring full traceability and quality while preventing adulteration.

The EcoVadis platinum medal, achieved in 2023 in recognition of our efforts in environmental, social, and corporate governance, confirms Euromed's commitment to sustainability.

FROM SEED TO FINAL EXTRACT

The quality of the raw material is essential to producing premium extracts that are shipped daily to five continents.

QUALITY RAW MATERIAL

Every batch of raw material received at our processing facilities undergoes rigorous screening and analysis.

PRODUCTION

Our state-of-the-art production facilities in Spain utilises advanced technologies and have obtained several quality certifications, including GMP, ISO, and NSF, among others.

QUALITY EXTRACTS

Each production batch, from herb to final extract, is subjected to multiple laboratory tests for identity, potency, and purity.

PACKAGING, STORAGE AND DELIVERY OF THE FINAL EXTRACT

We also ensure the quality of our extracts during delivery by adhering to GDP (Good Distribution Practices), guaranteeing optimal product dispatch.

BARCELONA HEADQUARTERS

Euromed's headquarters are located in Mollet del Vallès, Barcelona, Spain, and include a GMP-certified production facility, a state-of-the-art Innovation Centre housing our Quality Control and R&D laboratories, and adjacent warehouses.

It's the central hub for our worldwide operations. The Innovation Centre epitomizes scientific excellence and precision, symbolizing our commitment to advancing phytopharmaceutical research and development.

FLORIDA PROCUREMENT AND DRYING FACILITY

Understanding the importance of preserving the integrity of saw palmetto extract, Euromed® established a drying and procurement facility in Florida in 2004. Strategically located near the natural environment where saw palmetto grows, this facility allows us to control the entire supply chain from procurement to drying. This strategy ensures immediate proper drying of the berries after harvesting, preserving their potency and maintaining Euromed®'s commitment to genuine, high-quality botanical extracts.

MURCIA FACILITIES

Our Murcia facility, acquired in 2017 and situated in the “Garden of Europe”, boasts access to premium local raw materials from nearby orchards and farms. Combining traditional and innovative extraction methods, including the patented Pure-Hydro Process®, we produce high-quality botanicals such as our Mediterranean Fruit and Vegetable Extracts. We prioritize sustainability through solar power utilization and the proximity of the facility to the fields, which reduces our carbon footprint by minimizing transportation.

The Pure-Hydro Process® is an eco-friendly extraction method using ultrapure water as the only solvent, preserving and concentrating natural ingredients.

Extracts are pure and devoid of any impurities from residual volatile solvents, with improved safety, water solubility, and bioavailability.
