QUALITY & COMMITMENT

Our integrated quality system has the Bureau certificates Veritas ISO9001 and ISO14001 for the marketing and maintenance filtration equipment.

Committed to sustainability and human rights as partners signatories to the Global Compact on UN and members of its Spanish Network.

More than 30 years of experience in filtration and highly qualified staff will maintain your operational teams to guarantee your processes production.

Access to filtration solutions technology and Premium quality, will allow you obtain the highest protection of your equipment production while bringing you savings in energy consumption, cost reduction by production stops and unnecessary stocks.

Teams of filtration and spare parts for:

- Air intake
- Collection of dust, fumes and industrial gases
- Compressed air
- Regeneration of hydraulic and lubrication oils
- Fuels
- Industrial processes
- Condensate management
- Water management
- Air conditioning

We have experience and professionals approved for **advice** and more efficient **maintenance** of your equipment.

Control your Dust
collectors and
prevent emissions
or unexpected
stops.

INDUSTRY

Our service staff provide you with:

- Filtration equipment audits
- Steam management audits
- Design, sale, installation and maintenance of filtration equipment
- Analysis of oils and fuels
- Internet of things; constant transmission of data from their equipment for smart decisions
- Studies to improve process filtration to guarantee your final product saved energy costs
- Maintenance contracts with a guarantee of immediate availability of spare parts.
- Availability 24/7

POWER GENERATION

The **filtration systems** that **FIRES** supplies help power generation companies for millions of people to have electricity every day.

We meet the most demanding requirements to ensure that you get the **maximum power when it is needed.**

“ Innovative solutions to improve production and obtaining important cost savings ”

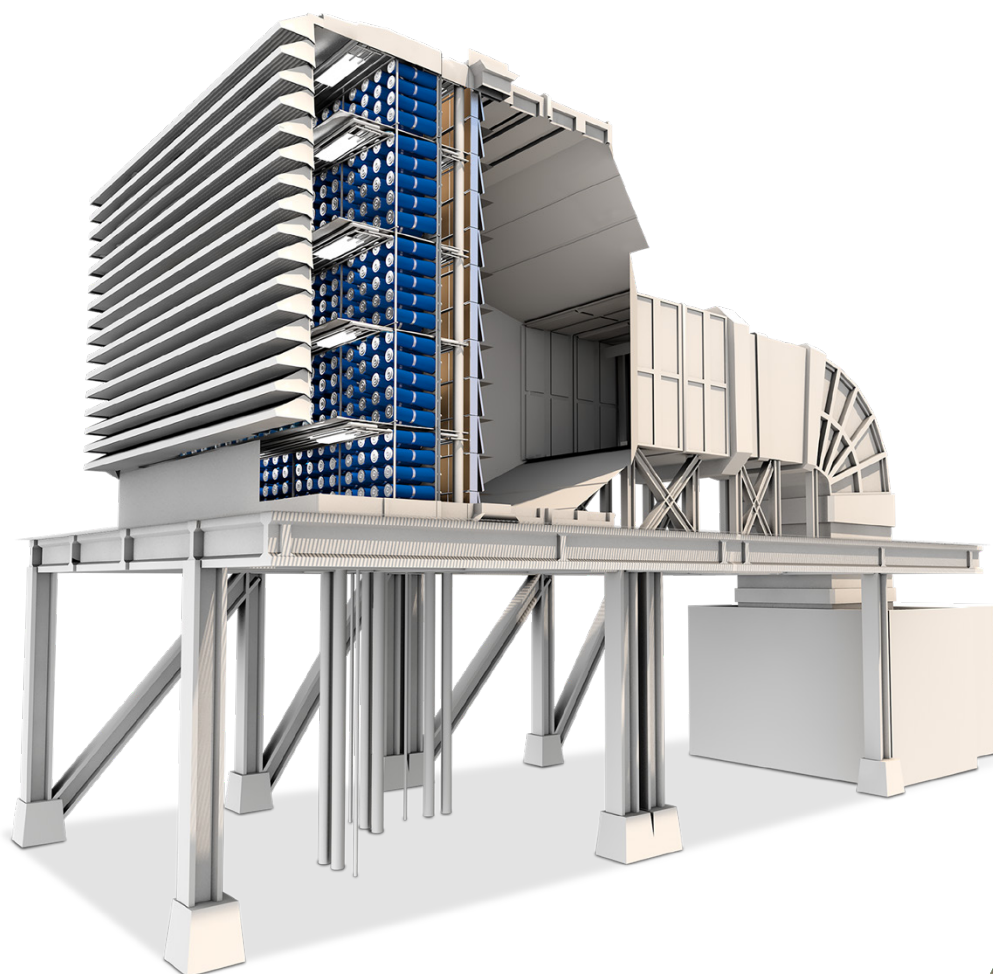

Services

- Filtration Systems Audit
- Risk classification of your plant
- Systems improvement studies to increase the performance of your equipment
- Management of your stock
- Purchase management
- Assistance service 24 hours
- Comprehensive maintenance contracts
- Assembly and maintenance of filtration systems
- Fluid analysis

Filtration equipment and spare parts for:

- Air intake from T.G.
- Lubrication systems
- Hydraulic system
- Gas and fuels
- Fresh and salt water
- Oil vents
- Filter blankets
- By Pass filters and mobile units

FLUID CONTAMINATION THAT GO

BEYOND THE FILTER

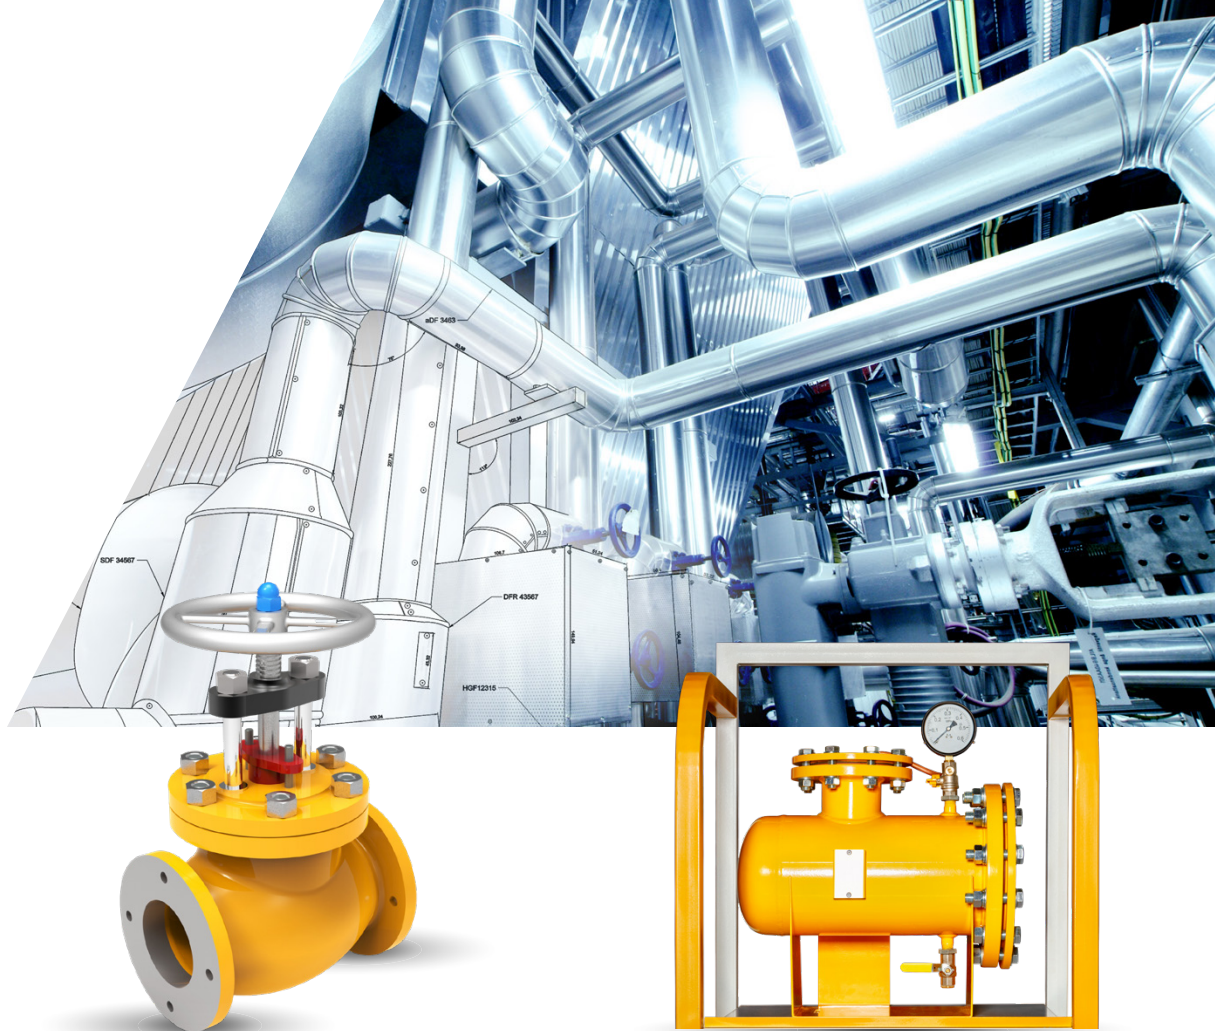

Better for the environment, better for your business

HILLIARD PRODUCTS - MADE IN AMERICA - CREATED FOR THE WORLD

Management and supply for projects

- Development of our own projects of installation and maintenance of filtration equipment
- Economic offers and technical management documentary for engineering projects E.P.C.
- Basket filters
- Duplex filters
- Temporary filters
- AND Filters
- Stone trap filters for solids in suspension
- Filter mesh
- Peepholes
- Traps and steam traps
- Expansion tanks
- Valves and actuators

ENGINEERING AND PROJECTS

Our clear commitment to quality and service makes it possible to put at your disposal a range full of filtration solutions and spare parts with the guarantee of manufacturers like Donaldson, Parker, Parker Racor, TripleR, Wix-Mann...

We have 2,000 m² that together with a weekly supplies from our suppliers make possible to have a stock for immediate delivery of:

- Primary and secondary filters for engine air intake.
- State-of-the-art PowerCore™ filters
- High efficiency air pre-filters
- Filters for dust collectors
- Complete filters, clogging indicators, elbows, clamps...
- Lubrication oil filters
- Filters for hydraulic oils with state-of-the-art filter media.
- Equipment for used oil regeneration
- Fuel filters, water separators
- Coolant filters
- Filters for bulk tanks and fuel dispensers

MOBILE EQUIPMENT

Our Services department has **qualified technicians** who will advise you to extend the life of your oils, measure contamination levels by particles and water from their oils and fuels, eliminate contamination by bacteria, protect your vents...

We listen to people and their machines using **IoT systems**, Internet of Things through an alliance with Donaldson and Geotab, the largest IoT operator.

We install the sensors that will transmit the data of your equipment to us in real time and continuous, in a **quick and simple way**.

We analyze data such as the situation of your filter elements, idling time of your machines, route time, consumption, response time to alarms, brake use, fluid levels... to provide you with reports that will allow you to make decisions that will obtain **significant savings of costs**.
