ABOUT US

INELTRÓN is an international company specialized in the comprehensive provision of engineering, construction, commissioning and maintenance services for electrical, instrumentation and control systems in industrial plants.

Our headquarters are located in the **northwest of the Iberian Peninsula**, origin of our company and, together with the commercial offices located in **Madrid, Portugal, Lithuania and United Kingdom**, the place from where our daily activities, workers and teams along the world are coordinated and managed simultaneously.

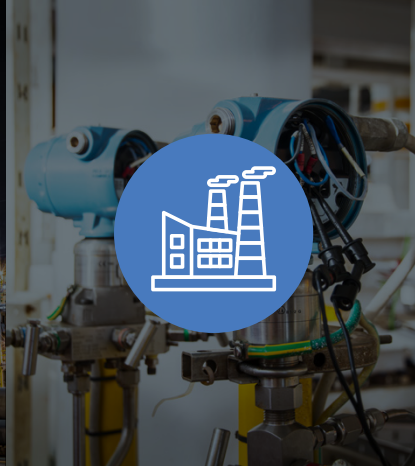

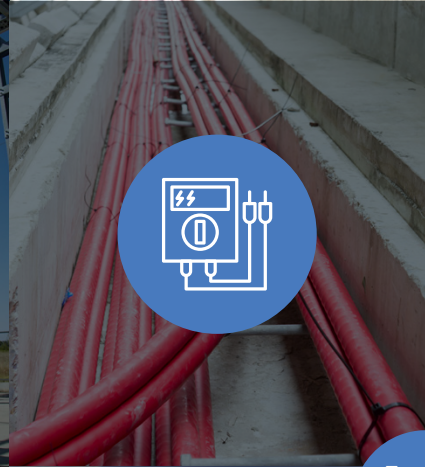

INDUSTRIES & SECTORS

We are the key partner to guarantee the best results in any turnkey project, optimizing time and cost under high standards of quality, safety and sustainability.

INDUSTRIAL PLANTS: ELECTRICAL, AUTOMATION & CONTROL

Design, assembly and commissioning of industrial electrical, instrumentation and control installations in various sectors.

Our specialists comprehensively implement and supervise the processes in all phases, from assembly and supervision to the implementation and testing of the final functionalities and their subsequent maintenance during the operation phase.

SERVICE
360°
From engineering
to maintenance.

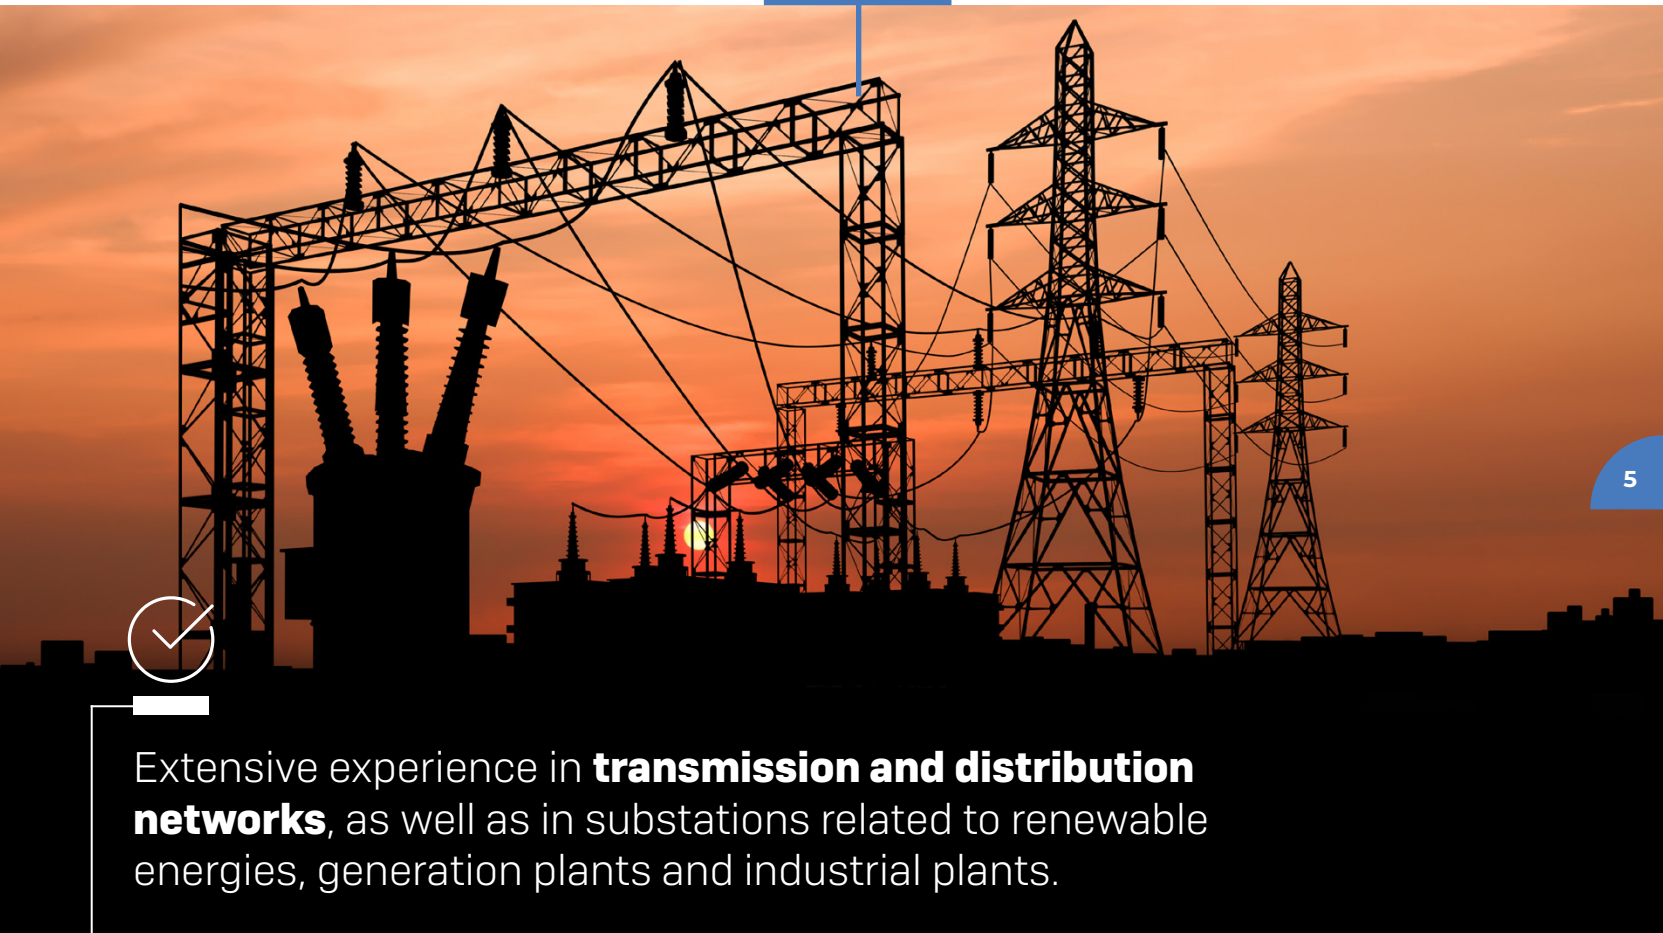

At INELTRÓN **we guarantee effective and personalised alternatives** that ensure the viability and success of national and international projects.

SUBSTATIONS & POWER LINES

Turnkey projects for substations and high-voltage power lines.

As an EPC Contractor, INELTRÓN offers a comprehensive solution that includes engineering, procurement, construction and commissioning of substations and medium, high and very high voltage power lines, applying the highest quality standards.

Extensive experience in **transmission and distribution networks**, as well as in substations related to renewable energies, generation plants and industrial plants.

RENEWABLE ENERGIES

Assembly and commissioning of electrical installations in wind farms and Photovoltaic power plants.

As an electrical subcontractor, INELTRÓN offers the client all its experience in this sector:

-  **Laying, connection and testing of medium-voltage networks in wind farms.**
-  **Complete solar photovoltaic electrical installation: from the start of the strings in the modules to the end of the evacuation at the substation.**
-  **Complete electrical, instrumentation and control installation in biomass, hydro and solar thermal power plants.**

Especialistas en hincados y perforaciones para proyectos solares

Contamos con una potente y moderna maquinaria; Además, nuestro equipo de profesionales cuenta con alta cualificación y con una amplia experiencia en el sector.

TURNKEY PROJECTS FOR **SOLAR** PHOTOVOLTAIC INSTALLATIONS

As an EPC Contractor, INELTRÓN offers a complete turnkey service for the design, construction and commissioning of photovoltaic power plants.

With many years of experience in several countries and at the forefront of the sector, our engineers and technicians guarantee the best technical and constructive solutions. Dozens of projects are our guarantee.
