

Quality and innovation
in technical plastics

MORE THAN 40 YEARS
OF CONSOLIDATED EXPERIENCE:
ALWAYS ONE STEP FURTHER

VISION OF THE FUTURE WITH **INTERNATIONAL PROJECTION**

Since our beginnings, in the early 80s in Burgos, we have stood out as a company in constant evolution, with a clear enterprising and innovative character, which has allowed us to meet the supply needs of important Tier 1, first in our environment and, later all around the world.

Thanks to our continuous effort, as well as the flexibility to adapt to the changes and demands of the automotive industry all along the years, we have placed ourselves as an important national referent in the technical thermoplastics injection processes and, at the same time, thanks to our business policy that is committed to the diversification of markets and sectors, we have been able to expand our portfolio of services to other sectors such as electronics, heating and air conditioning systems, feeding and valves among others.

Apart from Spain, our products are present in Germany, Russia, France, Italy, Slovakia, Slovenia, the United States, Brazil, Mexico and Morocco, among other countries. In the last years, we have maintained an average annual business growth of 10% and we are convinced that, being faithful to our business strategy, based on continuous improvement and international projection, we will continue to conquer new horizons together with our customers.

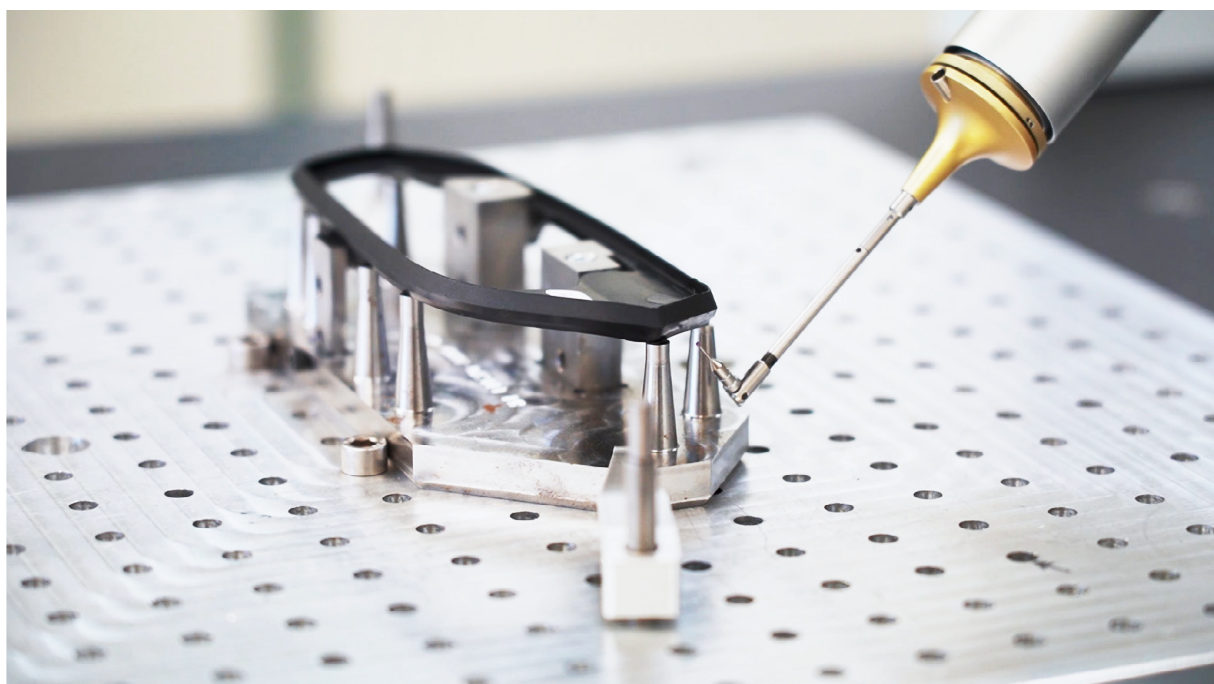

UBIPLAST

“Our extensive experience in the injection of technical plastics has enabled us to develop our own know-how, and thanks to our staff, who are the engine and heart of this company, we take care of our customers and our products and improve every day.”

Mireia Mancebo
Ubiplast General Manager

*"Innovation distinguishes leaders from followers.
Get closer than ever to your customers.
So close that you can tell them what they need well
before they realize it themselves."*

Steve Jobs

"We are a small company with big ideas, in permanent growth and evolution, which is one of our main competitive and distinctive advantages in our sector."

The key ingredients of our formula for success are a perfect blending of:

- Excellence in the quality of all the products we manufacture.
- A marked vocation for customer service to guarantee the best advice.
- Advanced technology for the automation of production processes. Innovation and efficiency.
- Capacity of our human resource, a multidisciplinary team of highly qualified and committed professionals.

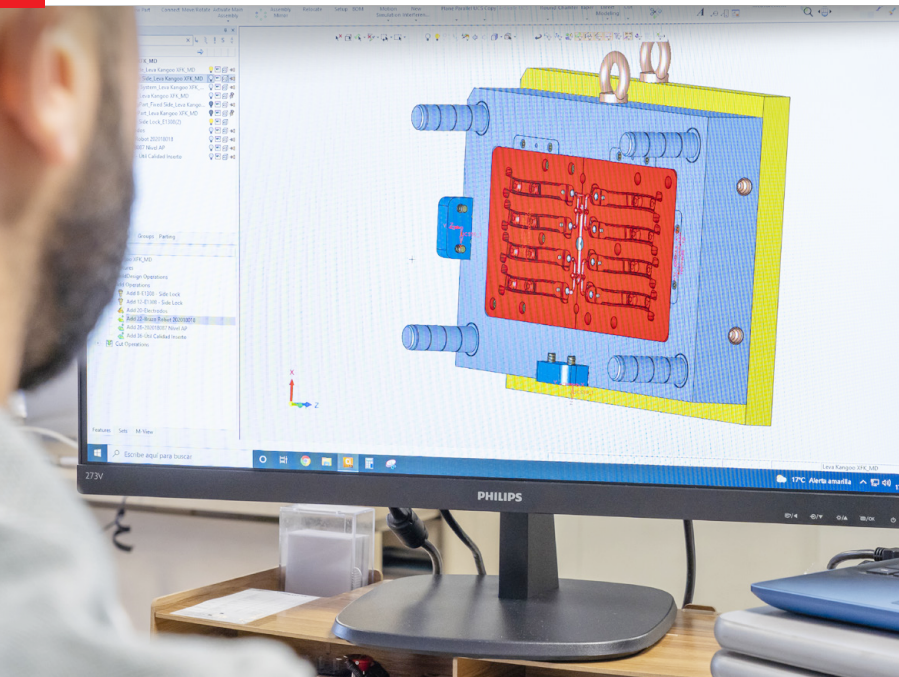

We have implemented an Integrated Management System to fulfill our quality policy, occupational safety and respect for the environment. Furthermore, we have important certifications and recognitions within the automotive industry, such as ISO 9001, IATF 16949 and the FICOSA Top Best Supplier 2019 award.

We are also committed to innovation and to staying at the vanguard in the injection of aesthetic and precision parts. All this has led us to win the best reward: the trust and loyalty of our customers.

UBIPLAST IS MUCH MORE THAN A COMPANY SPECIALIZED IN INJECTION MOLDING

GLOBAL PROJECTS MANAGEMENT

We provide our customers with a comprehensive "turnkey project service", covering all phases from the start to the end:

- Feasibility analysis.
- Personal design, according to the customer specific requirements.
- Approval and industrialisation.

For this purpose, we have all the necessary technical means and equipment. We also invest in the education and training of all our experienced team, to keep us updated and offer our customers the best services and solutions.

SERVICES DIVERSITY

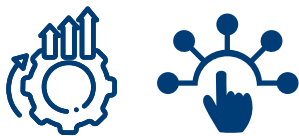

In our extensive and modern facilities we have our own complete assembly and second operations service, which makes us more competitive in terms of prices and lead times for the supply of assemblies, serigraphed parts and much more.

As an additional service to injection moulding, we also provide our customers with machining services, control equipments and special labelling, among others.

We are always attentive to expand and introduce new services based on the needs and challenges of each project.

"Quality means doing it right
when no one is looking."

Henry Ford

EFFICIENT PRODUCTION & PARTNERSHIPS

Without a good design and execution of the tools, as well as a careful maintenance of them, it is not possible to ensure the quality of the plastic parts. For this reason, in Ubiplast we have been committed since our beginnings to the value and importance of having our own tools workshop for the construction, modification and maintenance of toolings.

We also have the collaboration of external toolmakers, who work as partners for us, with very competitive lead times and providing added value in the design review and optimization stage.

“At Ubiplast we take the maximum care of each and every detail of the different phases of our production processes, we carry out exhaustive controls to guarantee the quality of our products and ensure their traceability.

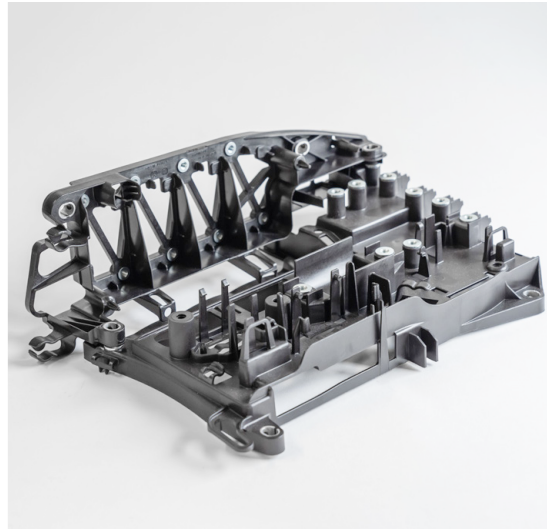

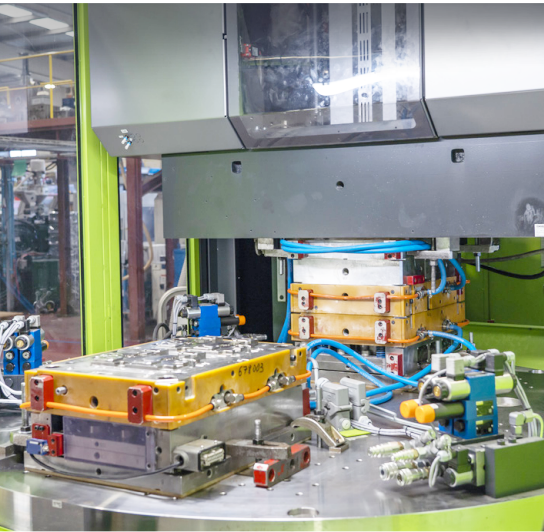

Our machine park is in continuous evolution and renovation to adapt to the needs of the market and new projects. Today, we have 26 injection molding machines, ranging from 90 to 650 tons of clamping force.”

DESIGN AND FUNCTIONALITY

ARE PERFECTLY COMBINED IN OUR PRODUCTS

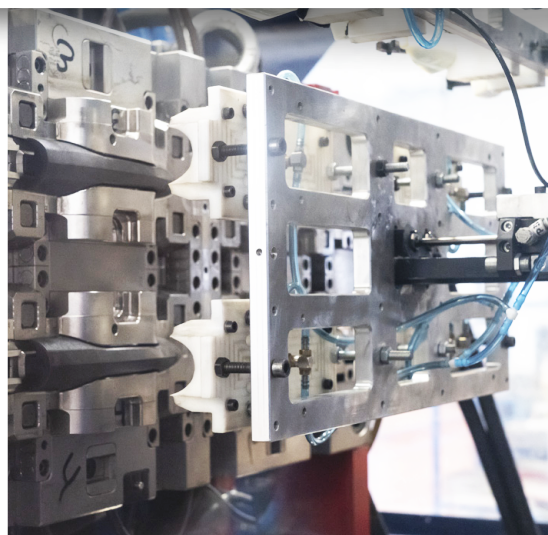

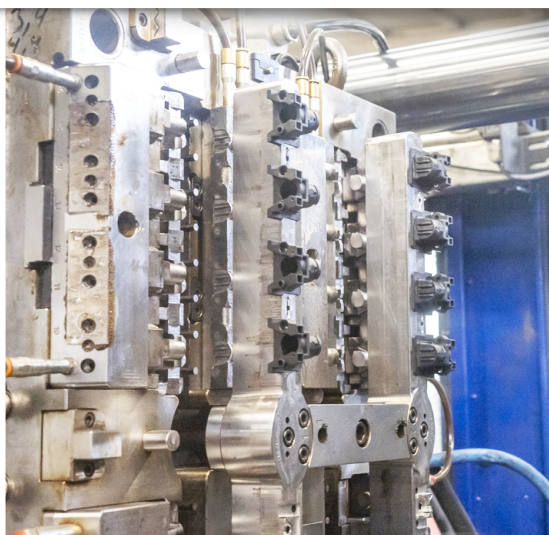

IN UBIPLAST WE ARE SPECIALIZED IN HORIZONTAL AND VERTICAL INJECTION:

- Over-injection of inserts and electronic pins.
- Aesthetic parts for later chroming or painting.
- Bi-material injection.
- Gas injection.
- Parts for optical applications.

"I love the technology that
makes me grow."

Sundar Pichai

“Our customers find in us the reliable partner that helps them to achieve the highest efficiency and profitability and, to find an answer for the technical and quality challenges in each project.”
